

BOOST COLLABORATIVE LAUNCH AGENDA

Date: Friday, September 15th 2017

Time: 8:00 AM to 2:30 PM

Location: Multipurpose Room 4, Creekside Community Centre, 1 Athletes Way, Vancouver, BC V5Y 0B1

The BOOST Collaborative Launch is an opportunity to bring all participating teams and their members together for an opportunity to network, learn from each other, and get to work on our plans for improving care for people living with opioid use disorder. First, we will orient teams to the overall project aims and expectations. Through interactive exercises, we will then develop team-specific aims and plans for testing change ideas. Teams will become familiar with the specifics of how we can measure for improvement (using our Guide to Measurement), and how we will report and share our results. Aside from our group exercises, we will hear from a number of speakers, including organizational leaders, key stakeholders, families of those affected by opioid use disorder, front-line care providers, and experts in the fields of Addiction Medicine and Quality Improvement.

Meeting Objectives:

By the end of the BOOST Launch, participants will be able to:

- Define and discuss the overall aim of the BOOST Collaborative and the key drivers influencing the desired outcomes
- Identify the gaps in OUD care in the Vancouver community region
- Define and discuss the key elements of quality improvement and apply them in practice
- Describe a continuum of care for people living with OUD
- Identify and explain their team's role in close gaps along this continuum of care
- Explain the definitions and expectations for collecting and reporting on core BOOST Collaborative measures
- Develop a clear team-specific aim statement
- Plan for testing specific change ideas in practice and measuring the outcomes
- Identify and access resources and supports available to participating teams

Speakers and Facilitators:

Mary Ackenhusen, MBA | CEO, Vancouver Coastal Health

Julio Montaner, MD | Director, BC Centre for Excellence in HIV/AIDS

Rolando Barrios, MD | Assistant Director, BC Centre for Excellence in HIV/AIDS | Medical Director, Vancouver Coastal Health, Vancouver Community
